b) List one of the events in which WebProfessionals.org participates. Would you like to attend this event? Why or why not?

"Best Practices When Starting to Work With a Client"

I'd love to attend this event, because the most valuable information is practical experience, and at this event, many professionals share their professional experiences. It's very useful to listen to, so you can use it in the future or perhaps need it someday, and you'll be prepared for unexpected situations. You'll also have the opportunity to meet new people in the field, which will be helpful.

c) List three ways that WebProfessionals.org can help you in your future career as a web developer.

First, they can help with your job search. For example, they offer a lot of advice and research that can help you find corporate work more easily, and they also provide early notifications of job openings.
Second, you can showcase your work at public speaking engagements and at conversations with companies and groups. This can be very helpful in finding connections, because that's everything.
And third, I could have included a lot of things, such as online training or sharing information about the participant's skills and projects, but I decided to include discounts on various services and products from companies they partner with after all, a penny saved is a penny earned. Sometimes this can be very helpful in life situations.
